# Splitting Pennies

---

**Something seems wrong with our world.** You know it intuitively, you just can't explain it. Why is our money worth less and less each year? Where does it all 'go'? The government? What do 'they' do with it? If the US Dollar is always going down in value, why don't rich become poor? Just read it.

**They don't teach this in school!**

## The Nixon System

Did you know that the current financial system used by the whole world was created by Richard Nixon by 'accident' - no plan, no idea about economics.

### How it began

After World War 2, the world agreed that America would be the world's banker. USA had so much gold, the thinking went, that US Dollars were 'as good as gold' and could be converted to gold at any time. But we abused this right during the 60's and 70's and Charles de Gaulle called the bluff; he demanded Nixon pay billions in gold. Instead of complying with the request, Nixon 'defaulted' on America's obligations and created a free floating FOREX system that is still in use today. Although we've seen revolutions in technology, transportation, medicine, and many aspects of life; our financial system is based on a model created 100 years ago. Understanding how this system works can help you grow your portfolio, help your career, open your mind, and make you healthy! The key to solving our economic problems, whether they be personal or as a country, lies in knowledge and education. Viva la revolution!

## Dollars are worth-less

Every minute, the value of the dollars in your pocket is less and less. It isn't just 'a fact of life' - it's by design. The modern FOREX system in use ensures that our money is worth less and less. But it's possible to protect yourself, and even profit! Learn how.

### Splitting Pennies the Book
